

Report Wednesday March 11

This is the sixth weekly report.

After another successful week of progress we had our sixth meeting this week. During this meeting we started off with a standup in which we discussed any issues that might have occurred during the work over the past week. The main issue at hand is a **corrupted branch** in our GitHub Repo preventing all our other open branches to be merged. The highest priority during our meeting was to resolve this. For this we appointed Michel as our 'workflow lead'. Part of his responsibility is getting and keeping Git up and running. Part of this issue was that some of the frontend progress got lost due to working locally instead of using git version control. In his new role Michel tried to resolve this. Unfortunately, it was unrecoverable, so part of the invested time by one of our engineers got lost. He is now working on recovering the code from memory and working on a new branch.

An overview of our team roles is as of today is:

Role	First name list
Managers	Frank, Wim, Job
Frontend lead	Egidius
Backend lead	Lars R.
Workflow lead	Michel
Frontend engineer	Lars W., David, Valentijn
Backend engineer	Matti, Martin

Table 1: Shows the roles and first names of the people associated with the roles.

Overview of activities of this week

Activity description	Done
Frontend feedback Client	<i>Recovering</i>
User selects files for script functionality	Yes
FA page upload functionality	Yes
Implement basic user accounts	Yes
Study workflow image Lars R.	Yes
Look into clam documentation	Yes
Get basic clam server up and running	Yes
FA html page – CSS mockup	Yes
Visual feedback to the user about upload and progress	Yes
User parameters for scripts	Yes

Table 2: Shows the tasks completed over the last week.

Activity description	Role	Assigned person(s)
Frontend rework	<i>Engineers</i>	Lars W., Martin, Valentijn
Add CI to our workflow	<i>Engineers</i>	Michel, David
Clam wrapper	<i>Engineers</i>	Lars R., Egidius
Upload persistency	<i>Engineers</i>	Matti

Table 3: Shows the tasks for the coming week for our engineers and managers

All in all, we are working hard and efficient. This is the last week of our first sprint. Next week on Tuesday (17 March) we are meeting with our clients to show them our MVP. Part of this meeting is collecting feedback on the product we managed to produce in one sprint. Next week Wednesday will most likely be filled with a feedback session, sprint review and poker for sprint 2.
